# Introducing The Wincode Internet Printer
Fully developed in India by the Wincode India Team
Edit & send any label file to the Wincode Internet printer

Connect Printer To Phone **Add Print File To APP** **Edit Data & Send File To Printer**

An Android based application that sends bar code labels to the Wincode Internet label printer. This application can carry thousands of label designs in the form of standard PRN files inside your phone. Whenever the need arises, open any label, edit the data and send the label design for printing from the phone in your pocket through the internet from anywhere!

Features of the Wincode Internet printer with the Label Application:

- No requirement of a PC, send data from your phone for printing from anywhere
- Dynamic data printing with a choice of changing the data of each of the input fields at the time of printing.
- Unlimited designs can be upload in the form of PRN files as they will stay in th phone memory space.
- Upcoming feature of connectivity to internet databases
- Upcoming compatible hardware attachments to add weighing scales, industrial machines scanners, keyboards etc.
